Dear Mr. Reddick,

We are pleased to offer you the following Erweka equipment:

Qty	Part #	Description / TYPE	Unit Price	Ext. Price
1	12-428-0000	TBH 220 WTD	\$16,009.00	\$16,009.00

The new TBH 220 WTD series is the basic Hardness Tester developed for those customers who require robust design, easy handling and fast validation without fulfilling 21 CFR 11 regulations. This model is designed to measure tablet weight, thickness, diameter / length and hardness. Since the samples are inserted into the test station manually all kind and shapes of samples can be tested. The unit is handled by a block of numeric membrane keys and the menu displayed at the illuminated 4-line LC display. Calibration is completely menu guided and may be performed by either weight stones or the electronic ERWEKA AutoCal System. Via a standard parallel printer interface a standard printer can be connected to receive a hard-copy documentation. The serial RS 232 interface allows to connect a computer with the optional MC.net software for external control. In combination with this, the TBH 220 series would then be considered 21 CFR 11 compliant.

- Up to 100 samples per test
- Electronic load-cell
- Tests samples up to 26 mm diameter
- Satorius analytical balance with windshield
- Measuring range for weigh 20.0 mg - 50.0000 g
- Accuracy ± 0.01 mg
- Measuring range for thickness: 0.10 to 12.00 mm
- Accuracy ± 0.3 mm
- Measuring range for diameter: 0.10 to 26.00 mm
- Accuracy ± 0.03 mm
- Measuring range for hardness: 3 - 500 N
- Accuracy ± 1 N
- Values in mm or inch
- Adjustable break between the samples-
- Two measuring principles available as standard (constant force or constant speed)
- Integrated programme menu for calibration of the unit with documentation print out
- RS 232 interface for external control and stor-age of results by the

Qty	Part #	Description / TYPE	Unit Price	Ext. Price
		optional MC.net software - Parallel Printer interface for documentation of time, date, results and statistics		
1	67-42x-9999	IQ/OQ handbook, TBH 250 Series Validation handbook (IQ/OQ) for ERWEKA TBH 220/250 Series Testers.	\$632.00	\$632.00
				\$16,641.00
Budgetary price of equipment as referenced ...				

OPTIONAL CONSIDERATION:

1	80-433-0001	Auto Postioning Tool Auto Positioning Tool AutoPosition tool not only aligns convex shaped oblongs, additionally it moves the tablets against the end point! Therefore the risk of wrong measurement results by either inaccurate manual positioning or turning of the samples is dramatically lowered. For testing of standard samples a standard test station, without rollers, is implemented. Switching between the 2 different test stations is performed within seconds (no tools required).	\$3,827.00	\$3,827.00
---	-------------	--	------------	------------

Payment Terms:

30% of equipment price with purchase order
60% of equipment price upon shipment from Erweka America Corp.
10% of equipment price net 30 days (after delivery to customer site)

Thank you for expressing interest in our technology and I look forward to working with you in the future.

Best Regards,

JR Alicea, ext. 202
